"[A]n excellent book..." —The Economist

Financial Times Asia editor David Pilling presents a fresh vision of Japan, drawing on his own deep experience, as well as observations from a cross section of Japanese citizenry, including novelist Haruki Murakami, former prime minister Junichiro Koizumi, industrialists and bankers, activists and artists, teenagers and octogenarians. Through their voices, Pilling's *Bending Adversity* captures the dynamism and diversity of contemporary Japan. Pilling's exploration begins with the 2011 triple disaster of earthquake, tsunami, and nuclear meltdown. His deep reporting reveals both Japan's vulnerabilities and its resilience and pushes him to understand the country's past through cycles of crisis and reconstruction. Japan's survivalist mentality has carried it through tremendous hardship, but is also the source of great destruction: It was the nineteenth-century struggle to ward off colonial intent that resulted in Japan's own imperial endeavor, culminating in the devastation of World War II. Even the postwar economic miracle—the manufacturing and commerce explosion that brought unprecedented economic growth and earned Japan international clout might have been a less pure victory than it seemed. In *Bending Adversity* Pilling questions what was lost in the country's blind, aborted climb to #1. With the same rigor, he revisits 1990—the year the economic bubble burst, and the beginning of Japan's "lost decades"—to ask if the turning point might be viewed differently. While financial struggle and national debt are a reality, post-growth Japan has also successfully maintained a stable standard of living and social cohesion. And while life has become less certain, opportunities—in particular for the young and for women—have diversified. Still,

Japan is in many ways a country in recovery, working to find a way forward after the events of 2011 and decades of slow growth. *Bending Adversity* closes with a reflection on what the 2012 reelection of Prime Minister Shinzo Abe, and his radical antideflation policy, might mean for Japan and its future. Informed throughout by the insights shared by Pilling's many interview subjects, *Bending Adversity* rigorously engages with the social, spiritual, financial, and political life of Japan to create a more nuanced representation of the oft-misunderstood island nation and its people. The *Financial Times* "David Pilling quotes a visiting MP from northern England, dazzled by Tokyo's lights and awed by its bustling prosperity: 'If this is a recession, I want one.' Not the least of the merits of Pilling's hugely enjoyable and perceptive book on Japan is that he places the denunciations of two allegedly "lost decades" in the context of what the country is really like and its actual achievements." The *Telegraph* (UK) "Pilling, the Asia editor of the *Financial Times*, is perfectly placed to be our guide, and his insights are a real rarity when very few Western journalists communicate the essence of the world's third-largest economy in anything but the most superficial ways. Here, there is a terrific selection of interview subjects mixed with great reportage and fact selection... he does get people to say wonderful things. The novelist Haruki Murakami tells him: "When we were rich, I hated this country"... well-written... valuable." *Publishers Weekly* (starred): "A probing and insightful portrait of contemporary Japan."

When a Line Bends ... a Shape Begins Brookings Institution Press
Rage is an unprecedented and intimate tour de force of new reporting on the Trump presidency facing a global pandemic, economic disaster and racial unrest. Woodward, the #1 international bestselling author of *Fear: Trump in the White House*, has uncovered the precise moment the president was warned that the Covid-19 epidemic would be the biggest national security threat to his presidency. In dramatic detail, Woodward takes readers into the Oval Office as Trump's head pops up when he is told in January 2020 that the pandemic could reach the scale of the 1918 Spanish Flu that killed 675,000 Americans. In 17 on-the-record interviews with Woodward over seven volatile months—an utterly vivid window into Trump's mind—the president

provides a self-portrait that is part denial and part combative interchange mixed with surprising moments of doubt as he glimpses the perils in the presidency and what he calls the “dynamite behind every door.” At key decision points, *Rage* shows how Trump's responses to the crises of 2020 were rooted in the instincts, habits and style he developed during his first three years as president. Revisiting the earliest days of the Trump presidency, *Rage* reveals how Secretary of Defense James Mattis, Secretary of State Rex Tillerson and Director of National Intelligence Dan Coats struggled to keep the country safe as the president dismantled any semblance of collegial national security decision making. *Rage* draws from hundreds of hours of interviews with firsthand witnesses as well as participants' notes, emails, diaries, calendars and confidential documents. Woodward obtained 25 never-seen personal letters exchanged between Trump and North Korean leader Kim Jong Un, who describes the bond between the two leaders as out of a “fantasy film.” Trump insists to Woodward he will triumph over Covid-19 and the economic calamity. “Don't worry about it, Bob. Okay?” Trump told the author in July. “Don't worry about it. We'll get to do another book. You'll find I was right.”

Murder on Mulberry Bend Ballantine Books

A powerful novel in verse about fitting in, standing out, defining your own self-worth, and what it takes to keep a fracturing family whole. Virtual twins Linc and Holly were once extremely close. But while artistic, creative Linc is her parents' daughter biologically, it's smart, popular Holly, adopted from Ghana as a baby, who exemplifies the family's high-achieving model of

academic success. Linc is desperate to pursue photography, to find a place of belonging, and for her family to accept her for who she is, despite her surgeon mother's constant disapproval and her growing distance from Holly. So when she comes up with a plan to use her photography interests and skills to do better in school--via a project based on Seneca Village, a long-gone village in the space that now holds Central Park, where all inhabitants, regardless of race, lived together harmoniously--Linc is excited and determined to prove that her differences are assets, that she has what it takes to make her mother proud. But when a long-buried family secret comes to light, Linc must decide whether her mother's love is worth obtaining. A novel in verse that challenges the way we think about family and belonging. Praise for *The Way the Light Bends* "I fell into Linc's world and found myself changed by her journey. Readers will fall in love with her and her struggles." - Dhonielle Clayton, author of the *Tiny Pretty Things* series and *The Belles* "Achingly beautiful, honest and visceral. This is a must read for anyone who has questioned whether they belong." -Meg Wiviott, author of *Paper Hearts* "Linc's struggle to chart her own future, unfolding in graceful verse, makes a compelling read." --Kirkus Reviews "Give this book to any students who have ever felt invisible or who have ever struggled to feel at home in a traditional academic setting." --School Library Journal "The meshing of word choice and space integrates the protagonist's inner struggles with her undeniable talent as a budding photographer." --Voice of Youth Advocates "Rich with imagery that embodies longing and heart, a girl's desire to recapture what was, and her joy over discovering her own kind of

success." --Booklist "The book tugs at the heartstrings by focusing on family dynamics and expectations that are universal experiences." --School Library Connection

Japan and the Art of Survival Basic Books

Guss, Felix, and Jim Upshaw founded the community of County Line in the 1870s in northwest Nacogdoches County, in deep East Texas. As with hundreds of other relatively autonomous black communities created at that time, the Upshaws sought a safe place to raise their children and create a livelihood during Reconstruction and Jim Crow Texas. In the late 1980s photographer Richard Orton visited County Line for the first time and became aware of a world he did not know existed as a white man. He went down the rabbit hole, so to speak, and met some remarkable people there who changed his life. The more than 50 duotone photographs and text convey the contemporary experience of growing up in a "freedom colony." Covering a period of twenty-five years, photographer Richard Orton juxtaposes his images with text from people who grew up in and have remained connected to their birthplace. Thad Sitton's foreword sets the community in historical context and Roy Flukinger points out the beauty of the documentary photographs. This book should appeal to anyone interested in American or Texas history, particularly the history of African Americans in the South in the aftermath of the Civil War. The book should also be of interest to anyone with an appreciation for documentary photography, including students and teachers of photography. century New York City, has seen more than her share of joy and sorrow, birth and death. Now she will see for the first time how the squalor of the streets can breed madness and murder... The Prodigal Son Mission on Mulberry Bend stands as a refuge for girls who otherwise would have to live by selling the only thing they have of value—themselves. The work being done there so impresses Sarah that she volunteers to help out however she can—with clothes, with medical assistance, with the organization of a benefit dinner. And when one of the girls is found dead and refused burial because of her former life, Sarah's passion for justice is aroused. Reluctantly, Sergeant Frank Malloy agrees to look into the death, if only to keep Sarah from endangering herself by pursuing the matter. But Sarah cannot be kept out of the investigation—and just as Malloy feared, her attempts to find the cause of the unfortunate girl's death in the circumstances of her life put her in deadly danger—from an unexpected source...

When a Line Bends . . . A Shape Begins Turtleback

Starting in 1901 as a three-mile-long trolley line in East Chicago, Indiana, the Chicago South Shore and South Bend Railroad expanded in 1908 to connect South Bend, Indiana, with Chicago, Illinois. Once a treasure in the Sam Insull utilities empire, today it is the only functioning electric interurban in the United States. From a world-class city through rolling agricultural acres, from steel mills through a national lakeshore, some 200 vintage photographs illustrate the unique view of the Calumet region that South Shore passengers have traditionally enjoyed. Images of rolling stock, passenger depots, excursion destinations, and historic sites along the

way combine to reveal the century-long story of the railroad and its 90-mile corridor.

With the invention of compressed air in the 1840s, human divers could enter previously inaccessible deep water environments and engineers could design underwater mines and monumental bridges that had never been possible before. But a painful, sometimes fatal illness--decompression sickness, or the bends--mysteriously afflicted many of those who used compressed air. This book is a wide-ranging history of the wonders compressed air brought about and the suffering its unknown hazards inflicted. John L. Phillips explores the intertwining roles of science, technology, engineering, medicine, and politics in the invention of compressed air, the recognition and identification of decompression sickness, and the hundred-year-long process of learning to understand and treat the bends. The book begins with an overview of the biology and chemistry of respiration and a discussion of the steam engine that could generate compressed air. Drawing on previously unpublished letters, diaries, and notes, Phillips tells the story of early uses of compressed air, first observations of decompression sickness, growing awareness of the bends during construction of the Brooklyn Bridge, and efforts to understand the pathophysiology of the illness. He then considers employee health and safety issues, the science of diving today, and human limits to exploring the ocean depths. In the history of compressed air and its illnesses, Phillips finds important lessons for dealing with other diseases yet to be confronted in the modern

world.

In the "brilliant novel" (The New York Times) V.S. Naipaul takes us deeply into the life of one man—an Indian who, uprooted by the bloody tides of Third World history, has come to live in an

isolated town at the bend of a great river in a newly independent African nation.

Naipaul gives us the most convincing and disturbing vision yet of what happens in a place caught between the dangerously alluring modern world and its own tenacious past and traditions.
