Ozone oxidation - ZuiveringstechniekenTo produce pure drinking water, the removal of NOM is a prior task in modern water treatment. Ozone, like any other oxidant, seldom achieves a complete mineralisation

of NOM. Organic matter is partly oxidized and becoming more easily biodegradable. This results in a higher amount of BDOC (Biodegradable DOC). ozone application in drinking water - LenntechAccording to these results, most of the OH was likely transformed in the solution phase, and the oxidation degree had an effect on the ozone chain reaction.
