A detailed look into ancient advanced technology, science, and medicine--some of which has yet to be reproduced today • Explores countless examples of ancient high tech, including robotics, artificial intelligence, aircraft, solar-powered cannons, high-speed drills, illuminated underground temples, massive refrigerators, and subterranean cities • Examines evidence of advanced medicine in ancient times • Includes examples from ancient Egypt, China, Greece, Babylon, Siberia, the Americas, and India The first self-igniting match was invented in 1805 by Jean Chancel, a French chemist. Yet, in Babylon, 3,600 years before, identical sulfur matches were in common use. On the Panchavarnaswamy Temple in India, built millennia ago, there is a detailed carving of a man on a bicycle, yet the bicycle wasn't invented in the modern world until 1817. These inventions are only two examples of technology lost in the Dark Ages. Exploring the sophisticated tech achieved by ancient civilizations hundreds and thousands of years ago, Frank Joseph examines evidence of robotics and other forms of artificial intelligence; manned flight, such as hot-air balloons and gliders; and military science, including flamethrowers, biological warfare, poison gas, and solar-powered cannons. He reveals how ancient construction engineers excavated subterranean cities, turned stone walls into glass, lifted 100-ton blocks of granite, illuminated underground temples and pyramids, and stored their food in massive refrigerators. Examples explored in the book include the

first known alarm clock, invented by Plato in 4th-century-BC Greece; 600-year-old Aztec whistles that reproduce animal sounds and human voices with uncanny accuracy; Stone Age jewelry from Siberia worked by a high-speed drill; sex robots in ancient Troy, Greece, and China; ancient Egyptian aircraft; and India's iron pillar exposed to sixteen hundred years of monsoons but still standing rust-free. The author also explores evidence of advanced medicine in ancient times, particularly in Egypt and China, from brain surgery, optometry, and prosthetics to dentistry, magnet therapy, and cancer cures. By examining the achievements of our ancient ancestors, we can not only reverse-engineer their inventions but also learn from their civilizations' mistakes, enabling us to avoid more dark ages. Imagine how scientifically advanced humanity would be if our early achievements had escaped destruction and been allowed to develop?

Bestselling author Barbara Hand Clow shows how the Mayan Calendar is a bridge to galactic wisdom that fosters personal growth and human evolution • Unearths the meaning behind the calendar, its message for modern civilization, and what will happen when the calendar ends • Reveals how time acceleration is a manifestation of the acceleration of consciousness • By the author of The Pleiadian Agenda The Mayan Code is a deep exploration of how, as we approach the end of the Mayan Calendar, time and consciousness are accelerating, giving us a new understanding of the universe. Using Carl Johan Calleman's research, as well as the ideas of other Mayan Calendar scholars, Barbara Hand Clow examines 16.4 billion years of evolution to decode the creative patterns of Earth-the World Mind. These great patterns culminate in 2011, and then during 2012 major astrological influences will inspire us to attain oneness and enlightenment. The Mayan Code shows how the time cycles of the Calendar match important periods in the evolutionary data banks of Earth and the Milky Way Galaxy. These stages of evolution are converging during the final stage of the Calendar, the period between 1999 and 2011. War and territoriality, resource management and separation from nature, are all part of daily events we must process during these few short years: evidence of the tightening spiral of time that we experience as time speeding up. Barbara Hand Clow counsels that our own personal healing is the most important factor as we prepare to make this critical leap in human evolution--now referred to as the awakening of the World Mind.

While researching the metrology of the megalithic monuments of Britain and Egypt, Ellis made an important and previously unnoticed observation. Many of the megalithic monuments of the world, including Stonehenge and the Great Pyramid, can be viewed as being maps of the earth. These maps are verifiable as being designed in this fashion because they include within their structure the latitudes of specific topographical features on the surface of the earth. The architect of these monuments was making maps, the only thing now to be found is where the X marks the spot was placed... The ancient monument builders were constructing technical messages for the future, messages like the mathematical constant pi above. Thoth, Architect of the Universe has gone beyond this simple observation and found evidence of maps carved into the very fabric and design of these great megalithic monuments. Structures like the great henge of Avebury are quite obvious in their cartographical design, others, like the Great Pyramid of Giza, are less obvious. Nevertheless, all of these monuments can be seen to be maps of our Earth, maps that date from the Neolithic age.

It is a little-known fact that the exodus of the Hyksos pharaohs from Egypt to Jerusalem is an incredibly similar event to the exodus of the Israelites from Egypt to Jerusalem. Classical historians and theologians will not entertain any connection between the two, because this infers that the Israelite leaders were actually pharaohs of Egypt. However, Ralph Ellis has taken this obvious comparison and demonstrated the royal Egyptian ancestry of the Judaic patriarchs and also of Jesus. Ralph has also uncovered evidence for the New Testament Saul (St Paul) in the historical record, a discovery that brings with it several new accounts of the life of Jesus. Saul, the inventor of Christianity, was actually Josephus Flavius, a well-known historian. Jesus was the governor of Tiberias and owned a castle there; and he may have died during the siege of Jerusalem in about AD70, rather than AD 33 - crucified along with two of his compatriots. Followed by "Tempest & Exodus" and "Eden to Egypt". Latest version v5.6 Hyksos, Shepherd Kings, Jacob, Sea People, Jesus, Saul, Jerusalem, Egyptian False Prophet, historical Jesus.

The year is 2378, and the world knows sixteen-year-old Michael Eisenstein as someone who comes from a long line of mass murderers that spans more than three centuries. Yes, he is the most unlikely person to begin fighting for the survival of the human race. The planet has experienced eight additional world wars since the dawn of the twenty-first century, and extraterrestrials are living in the ocean, beneath a world devastated by the effects of climate change. Michael's mother, Monica, lives in fear, and his father, Benjamin, is the most recent Eisenstein responsible for creating ever larger and more efficient weapons of mass destruction. Michael, meanwhile, fears becoming his

father and struggles with suicidal depression that is, until he meets Maya and immediately falls in love. But when Ben takes Michael to Giza on a mission to find new energy sources, the boy accidentally falls into a tunnel and encounters a time traveler by the name of Ezekial. From there, the pair set out on the adventure of a lifetime, and Michael learns the truth about the fate of the earth and its people. In this science fiction novel, a sixteen-year-old boy living in 2378 on a devastated earth meets a time traveler and sets out to save humanity.

Completing our conscious evolution by releasing our collective fear of catastrophes • Explains how we are on the cusp of an era of incredible creative growth • Shows how we are about to overcome the collective fear caused by ancient catastrophes as we awaken to the memories of our lost prehistory • Examines legendary cataclysms and scientific evidence of a highly advanced global culture that disappeared 11,500 years ago In this completely revised and expanded edition of *Catastrophobia*, bestselling author Barbara Hand Clow explains how we are on the cusp of an age of incredible creative growth made possible by restoring our lost prehistory. Examining legendary cataclysms--such as the fall of Atlantis and the biblical Flood--and the mounting geological and archaeological evidence that many of these mythic catastrophes were actual events, she reveals the existence of a highly advanced global maritime culture that disappeared amid great earth changes and rising seas 14,000 to 11,500 years ago, nearly causing our species' extinction and leaving humanity's collective psyche deeply scarred. Tracing humanity's reemergence after these prehistoric catastrophes, Clow explains how these events in the deep past influence our consciousness today. Guided by Carl Johan Calleman's analysis of the Mayan Calendar, she reveals that as the Earth's 26,000-year precessional cycle shifts, our evolution is accelerating to prepare us for a new age of harmony and peace. She explains how we are beginning a collective healing as ancient memories of prehistory awaken in our minds and release our unprocessed fear. Passed from generation to generation, this fear has been responsible for our constant expectations of apocalypse. She shows that by remembering and moving beyond the trauma of our long lost past, we bring the era of cataclysms to an end and cross the threshold into a time of extraordinary creative activity.

Humans have been chasing immortality since the beginning of history, seeking answers to sickness and aging, death and the afterlife, and questioning the human condition. Analyzing ideas from ancient Sumer, Egypt, Greece and India, as well as the Abrahamic religions of Judaism, Christianity and Islam, this study explores how early religious models influenced later beliefs about immortality, the afterlife, the human soul, resurrection, and reward and punishment. The author highlights shared teachings among the most influential religions and philosophies, concluding that humankind has not substantially changed its conceptions of immortality in 6,000 years. This continuity of belief may be due to chromosomal memory and cultural inheritance, or may represent a fundamental way of conceptualizing the afterlife to cope with mortality. Instructors considering this book for use in a course may request an examination copy here.

- Traces the course of Atlantean civilization through its three empires, as well as the colonies and outposts formed by its survivors in Egypt, Göbekli Tepe, India, Mesopotamia, the Mediterranean, and North and South America
- Shows how pyramids and other megalithic monuments testify to the survival of a "Sacred Science" of Atlantean origin and how this Sacred Science provided the foundation for esoteric traditions and secret societies throughout the ages
- Draws on more than 500 ancient and modern sources and the author's own personal exploration of hundreds of archaeological sites

Exploring more than 100,000 years of Earth's history, Marco Vigato combines recent discoveries in the fields of archaeology, geology, anthropology, and genetics with the mystery teachings of antiquity to investigate the true origins of civilization. Establishing the historical and geological reality of Atlantis stretching all the way back to 432,000 BCE, he traces the course of Atlantean civilization through its three empires, revealing how civilization rose and fell several times over this lengthy span of time. The author shows that Atlantis did not vanish "in one terrible day and night" but survived in a variety of different forms well into the historical era. He reveals how the first Atlantean civilization lasted from 432,000 to 33,335 BCE, the second one from 21,142 to 10,961 BCE, and the third Atlantis civilization--the one celebrated by Plato--collapsed in 9600 BCE, after the Younger Dryas cataclysm. The author examines the role of Atlantean survivors in restarting civilization in different parts of the world, from Göbekli Tepe and Egypt to India, Mesopotamia, and the Americas. He explains how they created colonies and outposts around the globe, as evidenced by the colossal network of pyramids, earthen mounds, and other megalithic monuments they left behind. He shows how these monuments testify to the survival of a "Sacred Science" of Atlantean origin, and he documents the survival of the primeval Atlantean Tradition

through various secret societies into the modern era. Drawing on more than 500 ancient and modern sources and his own personal exploration of hundreds of archaeological sites around the world, the author shows not only that Atlantis was real but that the whole world is now being called to become a New Atlantis and awaken into a new Golden Age.

More than a mere retelling of well-known facts, the story begins with what may be the most elusive knowledge of our time—that of the extraterrestrial presence on Earth.

The Return of the Serpents of Wisdom Simon and Schuster

This book develops new science of gravity and light based on the century-old Le Sage theory of an ether that was replaced by Einsteins Theory of Relativity. After presenting astrophysical data contradicting the theory that the universe is expanding from a Big Bang, experiments believed to prove Relativity are shown to actually prove the ether theory instead. Freedom from the speed limit of light enables a science of subatomic particles traveling faster than light to produce gravity, electric and magnetic fields, light, and radio waves. Major technical innovations include solving the two fundamental problems with the Le Sage gravity theory and extending this theory to electromagnetism and consciousness. This is a theory of everything that explains the heretofore-unknown causes of the forces of nature. This book builds on the works of Zecharia Sitchin and other authors to explain how life developed on Earth and that evolution requires direction from intelligence that dwells in the subatomic particles on which this theory of gravity and light is based. Our biblical God is shown to be a composite of Sitchins extraterrestrial gods who colonized Earth and the intelligence that dwells alongside our own mind in the particles from which the universe is constructed and powered.

When we think we learned something new, we are quite proud of it. But it wears off quickly for an

unknown reason. So, what is wrong with what we do? When you start to think about the things you learn, and what the reason or purpose actually is, then you have to wonder sometimes is it really something new we just learned. Because having in mind to learn something new can be quite exhausting at times. Maybe we have to start to think about this in a different way, and take a different approach in discovering new things. It is like a treasure hunt, imagine that we are all pirates looking for an adventure or treasures. Obviously our life is about searching for something, but most of the time we don't even know what we are looking for. We do this quite instinctively, maybe we are preprogrammed in a way and we are not aware of it. But when you find out who we are, then everything seems to make sense. Our entire world (Universe) stands on myth and mythology (including our history), making us wonder if it is real. Let's look at life in a different way. Learn more about our history, maybe we can learn from old things our ancestors already knew, and then set that aside and try to find your own way. You most certainly will see things with different eyes. This is what our life is all about, it is a soul search where the experience we have along the way is the reward (treasure). In Australia the Aboriginal people are most likely a candidate for such an idea. They go on a regular Walkabout, which literally means looking for something. They might find something which can be worth bringing home as an idea for which the whole community can benefit from. This is what a walkabout is all about, looking for something which is useful, and has a value in the community. After all we are constantly occupied by making a living or providing for our needs. The westerners actually practice the same thing, we call them the Backpackers. People who go and see other parts of the world, enjoy the diversity and beauty of nature, as well as other cultures and traditions. Yes, we can learn something old, have a lot of fun and it can be quite rewarding. This book was taking shape, based on an ironic thought; How much knowledge there is, and we know so little. How come we know so little? We know all the most complicated things there can be, but we know very little of what life is about. What is the cause for all things? How does it all

work? What is the reason? And last but not least; How do we fit into everything? Is it possible that we have taken valuable information from ancient Greek knowledge, but ignored one of their most important practices the philosophy of all things. Has everything to us become scientific or important because sciences can explain the real world. Have we forgotten that this real world we live in comes from a mystical source (something unseen). Something we call a different dimension because we can't possibly explain it. It is such an exotic source, that it would take a lot of ancient knowledge to discover the truth. Do you want to discover the truth? This book might have some answers.

The Conspiracy Rhetoric of Mankind Simon and Schuster

According to ancient records, the patriarchs and founders of the early civilisations in Egypt, India, China, Peru, Mesopotamia, Britain and the Americas were colonised by the Serpents of Wisdom who arrived in these lands after abandoning their beloved homelands and crossing great seas. While bearing names denoting snake or dragon, these Serpents of Wisdom oversaw the construction of magnificent civilisations within which they and their descendants served as the priest kings and as the enlightened heads of mystery school traditions. This book recounts the history of these 'Serpents' and why they are returning now.
