Microsoft Data Mining approaches data mining from the particular perspective of IT professionals using Microsoft data management technologies. The author explains the new data mining capabilities in Microsoft's SQL Server 2000 database, Commerce Server, and other products, details the Microsoft OLE DB for Data Mining standard, and gives readers best practices for using all of them. The book bridges the previously specialized field of data mining with the new technologies and methods that are quickly making it an important mainstream tool for companies of all sizes. Data mining refers to a set of technologies and techniques by which IT professionals search large databases of information (such as those contained by SQL Server) for patterns and trends. Traditionally important in finance, telecommunication, and other information-intensive fields, data mining increasingly helps companies better understand and serve their customers by revealing buying patterns and related interests. It is becoming a foundation for e-commerce and knowledge management. Unique book on a hot data management topic Part of Digital Press's SQL Server and data mining clusters Author is an expert on both traditional and Microsoft data mining technologies

Drawing upon research and practitioner narratives from management, leadership, organizational studies, entrepreneurship and sustainable business domains, this book explores the many pathways that enable emerging countries to transform knowledge into action to achieve economic and sustainable development. The authors take a holistic approach to 'transforming knowledge' that goes beyond the mere 'application of knowledge' to include the assimilation, adaptation, and contextualization of knowledge to suit the unique contexts, needs and conditions existing in emerging countries. They then presents success stories and case studies comprising innovative solutions for emerging economies that practitioners can utilize. Current research in management is highlighted by bringing together academics, practitioners, policy-makers and interest groups from diverse regions and perspectives.

Human health depends on the health of the planet. Earth's natural systems--the air, the water, the biodiversity, the climate--are our life support systems. Yet climate change, biodiversity loss, scarcity of land and freshwater, pollution and other threats are degrading these systems. The emerging field of planetary health aims to understand how these changes threaten our health and how to protect ourselves and the rest of the biosphere. Interdisciplinary in nature, Planetary Health explores how accelerating environmental change affects each dimension of human health. It then turns to the rich terrain of solutions, reimagining our cities, our food systems, our energy sector, the chemicals we use, even our economics and our ethics. The result

is a comprehensive and optimistic introduction to a field that is being adopted by researchers and universities around the world. 50 Short Case Studies in Business Management (UUM Press)

The Case Study method of teaching and learning, adopted by business schools and management centres globally, provides an important function in management education, but employing it effectively can often be a challenge. This book provides practical insights, tools and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based, participant-centred learning environments, exploring good practices for case teaching and learning. It provides guidance for case writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment, supporting students' own development of cases to showcase good practice in organisations. The final section of this book showcases some of the resources available, providing links and reviews of additional material that can support future case teaching and writing practice, including publication. The Case Study Companion is designed for lecturers using cases within their teaching across all management disciplines, as well as those training for Professional Development and Management Education qualifications. It will also be useful for postgraduate, MBA and Executive Education students wanting to make the most of case studies in their learning and assessments.

This book presents a structured approach to formulate, model, and solve mathematical optimization problems for a wide range of real world situations. Among the problems covered are production, distribution and supply chain planning, scheduling, vehicle routing, as well as cutting stock, packing, and nesting. The optimization techniques used to solve the problems are primarily linear, mixed-integer linear, nonlinear, and mixed integer nonlinear programming. The book also covers important considerations for solving real-world optimization problems, such as dealing with valid inequalities and symmetry during the modeling phase, but also data interfacing and visualization of results in a more and more digitized world. The broad range of

ideas and approaches presented helps the reader to learn how to model a variety of problems from process industry, paper and metals industry, the energy sector, and logistics using mathematical optimization techniques.

How to Read, Discuss, and Write Persuasively about Cases

"In this groundbreaking book, Francesca Gino shows us how to spark creativity, excel at work, and become happier: By learning to rebel." — Charles Duhigg, New York Times bestselling author of *The Power of Habit* and *Smarter Faster Better* Do you want to follow a script — or write your own story? Award-winning Harvard Business School professor Francesca Gino shows us why the most successful among us break the rules, and how rebellion brings joy and meaning into our lives. Rebels have a bad reputation. We think of them as troublemakers, outcasts, contrarians: those colleagues, friends, and family members who complicate seemingly straightforward decisions, create chaos, and disagree when everyone else is in agreement. But in truth, rebels are also those among us who change the world for the better with their unconventional outlooks. Instead of clinging to what is safe and familiar, and falling back on routines and tradition, rebels defy the status quo. They are masters of innovation and reinvention, and they have a lot to teach us. Francesca Gino, a behavioral scientist and professor at Harvard Business School, has spent more than a decade studying rebels at organizations around the world, from high-end boutiques in Italy's fashion capital, to the World's Best Restaurant, to a thriving fast food chain, to an award-winning computer animation studio. In her work, she has identified leaders and employees who exemplify "rebel talent," and whose examples we can all learn to embrace. Gino argues that the future belongs to the rebel — and that there's a rebel in each of us. We live in turbulent times, when competition is fierce, reputations are easily tarnished on social media, and the world is more divided than ever before. In this cutthroat environment, cultivating rebel talent is what allows businesses to evolve and to prosper. And rebellion has an added benefit beyond the workplace: it leads to a more vital, engaged, and fulfilling life. Whether you want to inspire others to action, build a business, or build more meaningful relationships, *Rebel Talent* will show you how to succeed — by breaking all the rules.
